

Hello there!

This addon was made with lots of love and passion - I really enjoy the elder scrolls games, and I would like to make it even more fun for everyone. A lot of my time was spent delving into ESO's skimpy documentation on code, and raiding obscure forums to find the little bits of magic that make up this package. At times I have even been starved, been sleep deprived, and THE HORROR! Declined party and raid invites! To try and perfect this little gem. (Well not really, I always keep snacks next to me and sleeping late has always been a thing)

If you like this addon and want to show your appreciation, you can send a little money my way with the paypal button below to make code dancing a bit more bearable! I'll use it to restock my snacks. Or buy a kitten.

I am always open to chatting, come talk to me when I am online @Mookanana (Iakoni Captisa)

I love healing and tanking, but can't dps for nuts =)

Enjoy!

@Mookanana
